(a) the fork probe
camera image
estimate + measured perception error; chunk + measured execution error = 64 imagined starts
rollout engine: MuJoCo (reference) or world model; chunk, then 30-step imagined hold
stays: 31
topples: 33
64 imagined endings
split into two persistent, separated groups? yes = fragile
(b)
real futures (physics)
stays
topples
world model, stochastic
real
model
world model, deterministic
real
model
